SUMMARY REPORT
FT 950-I

June 1963

FOR RELEASE
August 9, 1963

IMPORT TRADE BY COUNTRY

The Bureau of the Census, Department of Commerce, announced today that the decrease in United States general imports, unadjusted for seasonal variation, from $1,461.5 million in May to $1,356.5 million in June[1] reflected lower levels of imports from all areas except Canada. Changes in the dollar values of imports from all areas from May to June were as follows: Western Europe, from $412.3 to $356.0 million; Latin American Republics, from $274.4 to $258.6 million; Canada, from $334.3 to $341.9 million; and "all other countries", from $440.5 to $400.0 million.

From May to June, imports from O.E.C.D. countries in Europe fell from $400.1 to $347.5 million, while those from sterling area countries dropped from $291.1 to $249.2 million. Decreases were reported in imports from all continents except Australia and Oceania.

The drop in imports from Europe from $422.1 million in May to $362.4 million in June reflected decreases in imports from most of the countries of this continent. The more notable of these decreases were United Kingdom, from $99.7 to $83.3 million; West Germany, from $86.7 to $75.1 million; Belgium and Luxembourg, from $34.7 to $26.5 million; Greece, from $6.3 to $1.9 million; and Netherlands, from $18.9 to $15.2 million. Imports from Africa fell from $71.7 to $54.8 million largely due to a drop in imports from the Republic of South Africa, from $28.1 to $16.8 million. The decrease in imports from Asia from $266.9 to $252.5 million was partly due to lower levels of imports from Japan, from $116.6 to $109.6 million; India, from $27.9 to $23.3 million; and Federation of Malaya, from $18.7 to $15.9 million. However, imports from the Republic of the Philippines advanced from $27.4 to $35.0 million. Imports from South America decreased from $184.2 to $174.3 million as decreases in imports from Colombia, from $21.4 to $12.7 million; Argentina, from $15.5 to $8.8 million; and Peru, from $16.2 to $12.6 million were largely offset by increases in imports from Brazil, from $28.9 to $36.3 million and Chile, from $12.4 to $18.4 million. Imports from North America declined from $479.7 million in May to $475.1 million in June. This change reflected decreases in imports from Mexico, from $55.1 to $46.6 million; Trinidad and Tobago, from $15.5 to $9.3 million; and Guatemala, from $5.7 to $2.7 million which were largely offset by increases in imports from the Dominican Republic, from $13.3 to $22.5 million and Canada, from $334.3 to $341.9 million.

Imports from Australia and Oceania increased slightly from $36.3 to $37.1 million owing chiefly to an increase in imports from Australia, from $17.4 to $23.8 million which was largely offset by a decrease in imports from New Zealand and Western Samoa, from $18.4 to $12.5 million.

[1]On a seasonally-adjusted basis, total general imports were valued at $1,410.2 million in June as compared to $1,406.2 million in May. (See the June 1963 issue of Report No. FT 900-I.) Seasonally-adjusted data are not available by country of origin.

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the United States armed forces for their own use. United States trade with Puerto Rico and United States possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the United States import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through United States Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from in transit merchandise only in the manner in which it is documented.

COUNTRY DEFINITION: Though the country which should be reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined or manufactured, the country actually shown in the statistics may in a number of cases represent some other country, such as the country of purchase, lading, or the country in which mixed lots of various origin are consolidated. It follows, therefore, that imports from such merchanting or transshipment countries are likely to be overstated and imports from other countries correspondingly understated.

VALUATION: Import values are, in general, based on market price or selling price, and are, in general, f.o.b. the exporting country. They exclude United States import duties. None of the values have been adjusted for changes in price level.

RELIABILITY: The statistics presented in this report are based partly on sample data (i.e. formal entries valued under $100 and all informal entries valued under $250), and therefore are subject to sampling variation that may cause them to differ somewhat from the results which would have been obtained from processing all import entries. The probable variability due to sampling is either less than $50,000 (the largest variation from rounding of figures) or less than 1 percent of the individual totals shown.

In addition to the effects of sampling variation, and the difficulties described above under COUNTRY DEFINITION, monthly import statistics are subject to some error from such sources as the carry-over of data from month to month in the compiling process and errors in reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account, particularly in using figures of relatively small magnitude.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Reports No. FT 110 and FT 120. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

UNITED STATES GENERAL IMPORTS, BY COUNTRY OF ORIGIN: JUNE 1963 AND SELECTED PERIODS

(In millions of dollars. N.e.c. indicates not elsewhere classified. General imports are a total of imports for immediate consumption plus entries into banded warehouses. Data revised to reflect all corrections published with the statistics through those for December 1962. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts.)

Continent and country[1]	June 1963	May 1963	June 1962	Monthly average 1962[2]

[a]Latin American Republics. [b]Sterling area countries. [c]Western Europe. [d]O.E.C.D. (Organization for Economic Co-operation and Development) countries in Europe. *Indicates less than $50,000. [1]For definitions of countries as used in this report, refer to current edition of Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. [2]The 1962 monthly average figures shown exclude February 1962 data on $1-$99 formal and $1-$250 informal entry shipments which are estimated as totaling about $9.7 million. Data on these shipments are also excluded from the individual area, continent, and country totals shown in this report and from the data in FT 930-I, FT 110, FT 120. IM 145, etc. [3]Effective with the Statistics for July 1962, the country designation "Portuguese Asia, N.E.C.", comprising Goa, Damao, Diu and Portuguese Timor become obsolete. Beginning with the September 1962 issue of this report, data for Goa, Damao, and Diu are shown separately while data for Portuguese Timor are included, along with data for other countries, in the figures for "Southern and Southeastern Asia, N.E.C." [4]Countries which could not be identified.
